EDUCATION

University of Texas at Austin

B.S. in Electrical and Computer Engineering, Certificate in Data Sciences

Austin, TX

Expected May 2025

GPA: 3.8 / 4.0

Coursework: Data Structures & Algorithms, Software Design and Web Development, Software Security & Privacy, Discrete Math

EXPERIENCE

JPMorgan Chase & Co.

Jun 2024 – Aug 2024

Software Engineering Intern

Austin, TX

- Developed a failure process management microservice using **Java Spring** that automates error handling and performs real-time monitoring for multiple internal systems, enhancing system reliability by 30%.
- Created **RESTful APIs** and **Kafka event streamers** to facilitate seamless data processing and integration with a **SQL** database, enabling efficient management of failure processes and time logs
- Maintained 100% code coverage, deployed the application on AWS servers, and utilized **CI/CD Jenkins** pipelines to ensure reliable deployment to production

Jun 2023 – Aug 2023

Software Engineering Intern

Houston, TX

- Developed a cloud-native, **full-stack feature** on a product catalog management system, enabling seamless creation and revision of banking services for clients with multi-million dollar assets
- Achieved a 100% reduction in turnaround time from **30 days to real-time**, allowing client advisors to modify product configurations instantly, ultimately cutting operation pain points and AWS server costs
- Created dynamic user interfaces and **RESTful APIs** using **React** and **Java Spring**, improving user interaction and functionality with the product configuration display
- Maintained 100% code coverage, and deployed the application to production on AWS servers with 100+ active business analyst users

Southwest Airlines

Jan 2024 – April 2024

Software Engineering Intern

Dallas (Remote), TX

- Implemented an Award & Badges prototype feature for southwest.com, enhancing user engagement by rewarding frequent flyers with incentives that provide in-flight benefits
- Designed user interface components using **React** and developed event-driven processes and **RESTful APIs** using **AWS Lambda** and **Flask**, ensuring seamless integration between the frontend and backend systems

Lockheed Martin

Jun 2022 – Aug 2022

Software Engineering Intern

Mount Laurel, NJ

- Developed a real-time data health monitor service aimed at detecting database failures and overload spikes, reducing manual testing errors and the quality assurance (QA) testing workflow timeline by 30%
- Created **RESTful APIs** using **Flask** and **Python** to database health logs from a **MongoDB** database

PROJECTS

MockHelp | *TypeScript, Next.js, Python, Flask, PostgreSQL, ChakraUI, GPT-4 Turbo API*

- Developed a full-stack web application that empowers tech industry professionals to improve technical and behavioral interviewing skills through AI-driven mock interviews, delivering personalized, human-like feedback for a realistic interview simulation experience

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C++, Bash, Assembly, HTML/CSS, SQL

Frameworks/Libraries: React, Spring, Flask, DynamoDB, MongoDB, H2 Database

Methodologies and Tools: Git, Linux, CI/CD, Jenkins, Agile Development, Atlassian Products, AWS Lambda

LEADERSHIP AND COMMUNITY INVOLVEMENT

Student Engineers Educating Kids (SEEK) Mentor | UT Austin University Orchestra Concertmaster | Intramural Basketball
